

Hingmed Ambulatory Blood Pressure Monitor

Component option:

Item	Cuff Option
1	Small adult cuff (18-26cm)
2	Middle adult cuff (22-32cm)
3	Large adult cuff (26-36cm)
4	Extra large adult cuff (33-43cm)

WBP-02A Wifi includes:

Item	Qty
Hingmed WBP-02A Wifi ABPM	1
Hingmed ABPM USB cable	1
Quick battery charger	1
Large adult cuff (26-36cm)	1
Hingmed WBP-02A Wifi ABPM instruction manual	1
Certification Card	1
Warranty Card	1

WBP-02A Wifi Product Parameters

Name	Hingmed 24 Hours ABPM
Model	WBP-02A Wifi
Technology	Oscillometric
Systolic	40-260 mmHg
Diastolic	20-210 mmHg
Heart Rate	40-200 BPM
Accuracy	± 3 mmHg
Battery	1000mah Li battery, support 100 times measurement
Memory	Saving 200 readings Maximum
Calibration	At least once per two years
Safety	Max inflation pressure 290mmHg; Valve open for deflation automatically upon power shutting off; Max measurement circle 120s.
Intervals Option	More individual programming intervals options (15, 30, 45, 60, 90, 120min)
Size	119 × 52 × 21mm
Weight	105g, including battery
Working Condition	Tem: 5°C - 40°C; RH: 10% - 95%; Atmospheric pressure: 70KPa - 106KPa;
Storage Condition	Tem: -20°C - +55°C; RH less than 95%; Atmospheric pressure: 70KPa - 106KPa;

HINGMED

WBP-02A Wifi

Hingmed Ambulatory Blood Pressure Monitor

WBP-02A Wifi ABPM provides automatic blood pressure measurement upon time intervals. With Wifi inside, it can transfer data to your centre platform wirelessly. It would be an ideal tool for your BP monitoring network platform.

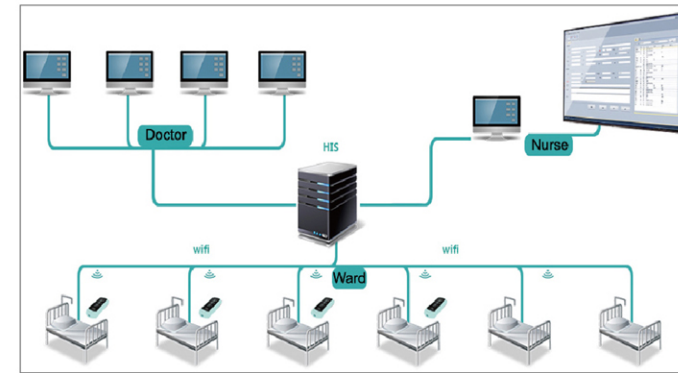

- Clinical level, accurate reading.
- Motion tolerance technology, good measurement consistency.
- Double pressure transducer, double protection.
- Low power consumption, one fully charging support 100 time measurement.
- Small, Light, Wearable.
- Wireless data transition to center server.

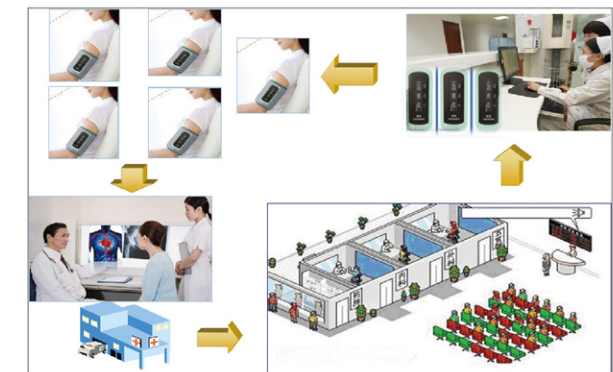

Hingmed WBP-02A Wifi ABPM APP

HINGMED

- Help to build inside hospital BP monitoring network, especially for hypertension diagnosis and hemodialysis treatment department.
- Provide communication protocol, and router setting software code.

- Optimize process of hypertension diagnosis, BP monitoring of hemodialysis patient and general in hospital patient etc.
- Fragmented BP data automatically collected for patient history and accurate analysis.
