Routine ABPM

When Simplicity means High Performance

DIASYS INTEGRA ACCESS

Record-breaking compactness

With less than 200g. of high technology, the Diasys Integra Access will ensure patient comfort and compliance.

Minimal running cost

Using leading edge technology, combining high capacity rechargeable batteries with a specially developed ultra-fast charger, ensures user friendliness and minimal operation costs.

A universal and intuitive interface

To help you save time Novacor has developed a user-friendly and intuitive software interface. Available for Windows™ and Mac™, the new DiasySoft software is not only compatible with the complete range of Diasys recorders, but also enables the integration of databases from other brands of recorders. Its modular structure allows you to benefit from different software functions as your needs change.

Simplicity & User friendliness

Easy to use, even without PC

When used as a stand-alone device, only two keys are needed to access the programming menus, while the "Plug & Print" function makes direct printing easy.

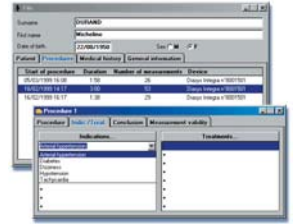

Powerful software

▲ **Clear display** allows rapid analysis of results.

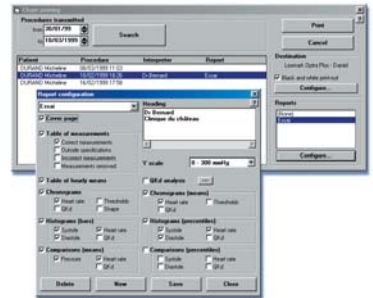

◀ **Easily programmed** to suit individual patient requirements.

Powerful database ▶ ensures easy management of patient files.

◀ **Multicriteria analysis** made easy thanks to a very effective search tool.

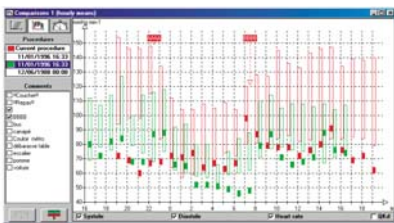

Flexible report configuration ▶

Efficiency & High performance

Advanced functions

Objective assessment of the Awake and Rest periods with the integrated position sensor, for a more accurate analysis of day-time and night-time blood pressure trends.

◀ **Data Transmission** of procedures via a very simple connection between the recorder and a modem / e-mail.

◀ **Evaluation of pharmacological treatment** easily assessed through simultaneous display of several procedures.

A complete system

A complete range of accessories has been specially designed for the Diasys Integra Access to ensure optimal performance.
